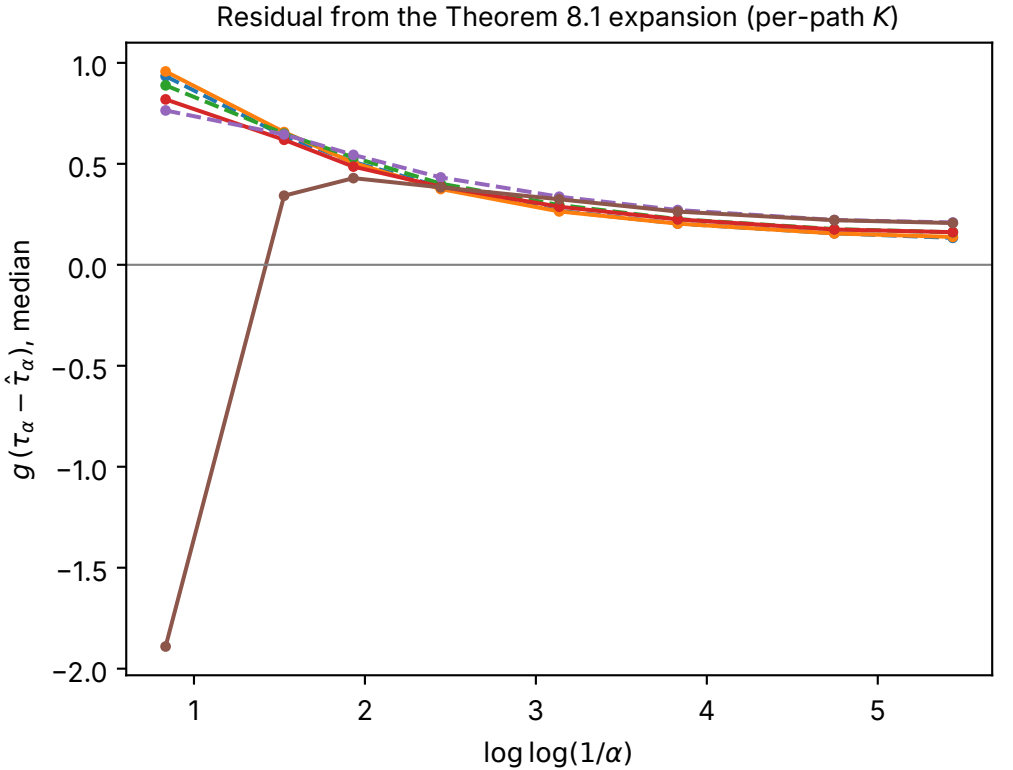
Safe detector (dark) and oracle (light), $R_{\min}/r_0 = 1.05$
$g\,\tau_\alpha$ (median)
$\log\log(1/\alpha)$
g=0.05, NB kappa=0.5
g=0.05, Poisson
g=0.1, NB kappa=0.5
g=0.1, Poisson
g=0.2, NB kappa=0.5
g=0.2, Poisson
slope 1 (theory)



Residual from the Theorem 8.1 expansion (per-path K)
$g\,(\tau_\alpha - \hat{\tau}_\alpha)$, median
$\log\log(1/\alpha)$
